

Data Dynamics

Paying By Bitcoin Agreement

Data Dynamics LLC is tremendously excited to be able to accept the new and revolutionary world of Bitcoins as one of our various payment options! Bitcoins, or Bit-Coins are a digital currency invented (or largely attributed to be created) by Japanese programmer Satoshi Nakamoto in 2009.

Due to the inherent nature of a relatively new and pioneering currency, there are a few points of note that are to be made should a client wish to pay for Data Dynamics Services by way of Bitcoins.

- Data Dynamics' receiving address will be uniquely generated per transaction and only shared with clients.
- As Bitcoin is in constant flux with pricing, the Law of Averages will be used to compile the Client's payment conversion from United States Dollars (USD) to Bitcoins (BTC) over the previous day's history of prices which will be referenced from Bitcoincharts.com. If a client's Deposit VS Final Balance take place 15 days apart from each other, the average BTC price will be recalculated for the Client to send to Data Dynamics when the next payment is due.

This allows protection for the Client should the current-day price of BTC plummet and allows protection for Data Dynamics should the price of BTC skyrocket. This ensures the client pays as few coins as is needed.

An example: Dianne pays for a session of rendering time. Over the previous day, the BTC Price is \$9 USD per coin. Thus, she will pay the according render time balance in Dollars divided by Bitcoins. There is no guarantee by Data Dynamics of any price at any time except when quoted. Price quotes are valid for 3 hours only.

Please note that for Remote Rental, a minimum order of \$20 USD equivalent is required for your session to begin with us. Thank you.

Data Dynamics

Paying By Bitcoin Agreement

- Under no circumstances will refunds be given in BTC. Data Dynamics will utilize paying by USD for any and all Client Refunds. The Client will also agree to Data Dynamics' Refund Policies in the Terms Packet.
- Balance-Owed and Payment-Made Records - just like for any other Client, will be made for recordskeeping and given to the Client after each transaction occurs. Once all payments have been made, the Client will receive an Invoice showing \$0 balance as if s/he paid with check, cash, or credit card.
- Data Dynamics retains any and all right to redeem paid BTC at any online trade exchange at any point in time for any BTC value.
